ABOUT ME

I'm **Hanumant**, focused on turning user insights into thoughtful interactions, structured prototypes, and working experiences through design & code.

KEY PROJECTS

BlaBlacar Redesign

Design Case Study · Visual Ergonomics

On going
AUG'26

- Evaluating BlaBlaCar's passenger journey from driver comparison to pickup using **HTA and heuristic evaluation**, identifying gaps in trust cues, booking details, and pickup information that may hinder confident, low-error decisions.
- Applying **SHERPA to booking confirmation**, pickup-point selection, and driver coordination, translating predicted errors into preventive and recovery states, and validating the redesign through task success, **error rate, time-on-task, NASA-TLX**, and perceived trust.

Insti Web App

UI/UX Project – Devcom

JAN'26

- Interviewed GSecs, GSHA and Secretaries** to uncover approval and tracking gaps, translating findings into dedicated queues, clear status visibility, **rejection feedback** and edit-resubmit workflows.
- Reworked **InstiApp's information architecture** by separating Events, Competitions and Announcements, adding deadline-based prioritisation, operational filters and live previews to improve review clarity and publishing accuracy.

AI Scribe App

UI/UX Project – Freelance

OCT'25

- Synthesised simulated clinician research through **personas, JTBD, affinity mapping and journey maps** to identify documentation and trust needs; reframed the workflow as “**capture → verify → approve**,” introducing evidence-linked review, inline correction and explicit approval.
- Designed a responsible-AI framework with uncertainty flags, transcript traceability, autosave/recovery and protected edits; illustrative testing improved task completion **78% → 91%** and **SUS 68.9 → 80.4**.

SKILLS & TOOLS

Core – User Interviews, UX research, Contextual Inquiry, Affinity Mapping, Personas, Journey Mapping, Task Analysis, Usability Testing, Heuristic Evaluation, SHERPA, Information Architecture, User Flows, Wireframing, Prototyping, Conceptual Models,

Visual Design – UI Design, Visual Hierarchy, Typography, Design Systems, GRID systems.

AI & Tools – AI Prototyping, Vibe coding, Figma, FigJam, Adobe Suite, Framer, Webflow, Cursor, Claude, ChatGPT, Perplexity.

WORK EXPERIENCE

Recoup Health

Graphic Designer

present
MAR'26

- Worked with **Recoup Health**, a healthcare company focused on root-cause treatment and holistic rehabilitation, creating Instagram posts and carousels, campaign logos, **presentation decks, boards, visiting cards**, and **AI-generated marketing videos** across digital and offline brand touchpoints.

Devcom – IIT Bombay

Interaction & Visual Designer

MAR'25 – FEB'26

- Worked with **DevCom**, IIT Bombay on digital communication and product design creating **Instagram creatives**, designing the **REACH research & career portal**, and pitching a redesign of the **InstiApp web portal** to improve information architecture, event discovery, and approval workflows.

Mood Indigo – IIT Bombay

Design Co-ordinator

AUG'25 – DEC'25

- Contributed to **Mood Indigo**, IIT Bombay's **flagship cultural festival** and one of Asia's largest college festivals, by designing the **accommodation website** and developing multiple iterations of the **MI Studio logo**, ultimately refining and delivering the final identity.

Mphasis Limited

Account Opening Operations.

MAR'24 – JUL'24

- Supported **wealth-management account-opening operations** at Mphasis, processing **investment and beneficiary-related account requests** by **creating and reviewing client/account records**, validating documentation and account information, and following established KYC, compliance, and quality-control procedures to ensure accurate and timely onboarding.

ACHIEVEMENTS

- Bronze Medalist (3rd Place)** — General Championship Powerlifting Competition.
